Pil, kailan ko ba pwede anihin itong mga palay ko? Gusto ko na sana anihin dahil may paparating na bagyo.

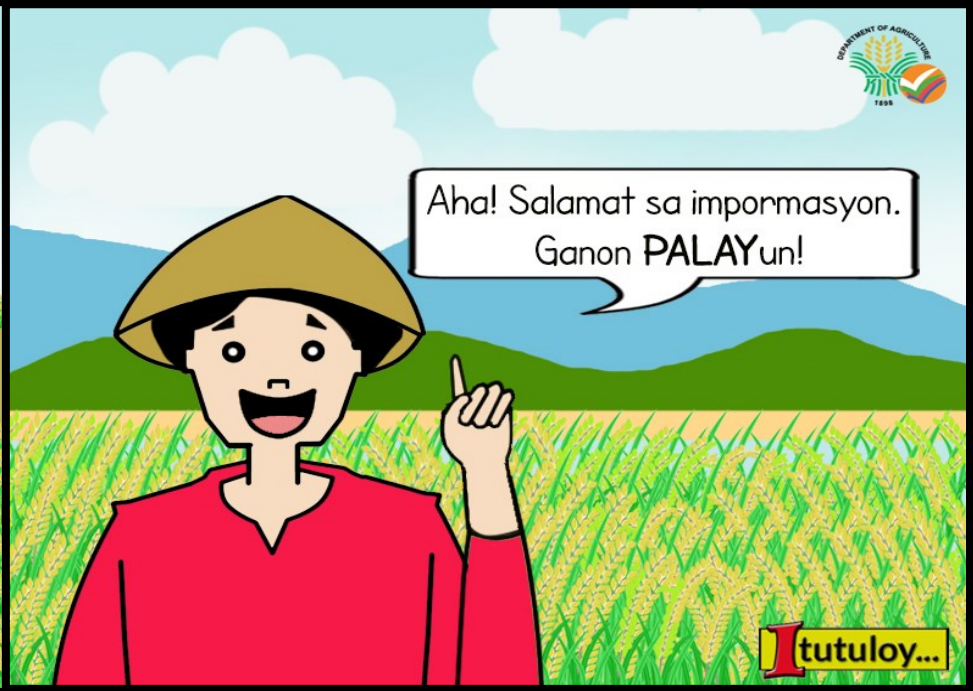

Gep, ang palay ay maaari nang anihin kung 85-95 % ng mga ito ay magulang na at matingkad na dilaw (golden yellow) ang kulay. Ito ay kung aanihin ang palay ng manu-mano. Halika, ipapakita ko sa iyo.

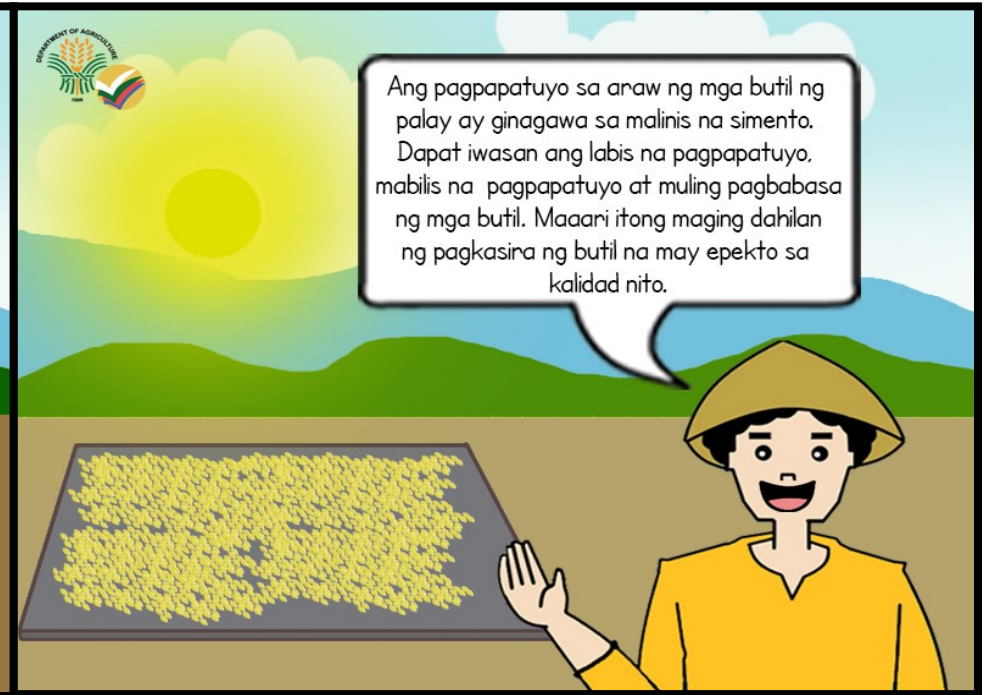

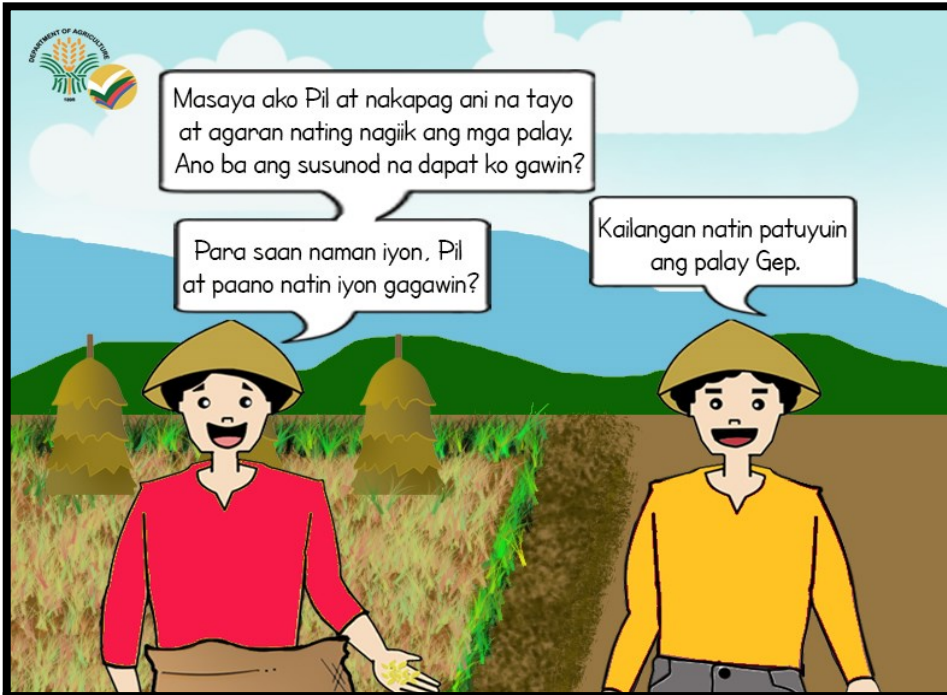

Narito Gep ang aking palayan na maaari ng anihin. Sa paggamit naman ng combine harvester maaari nang anihin ang palay kung 90-95% (shattering varieties) o 90% (non-shattering varieties) ay magulang at tama ang kulay.

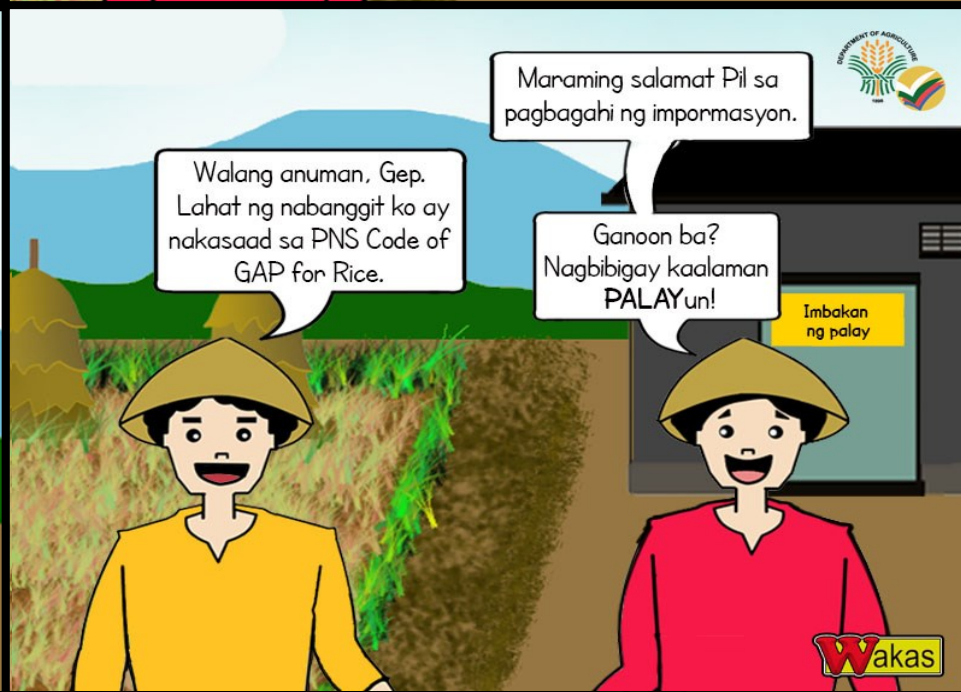

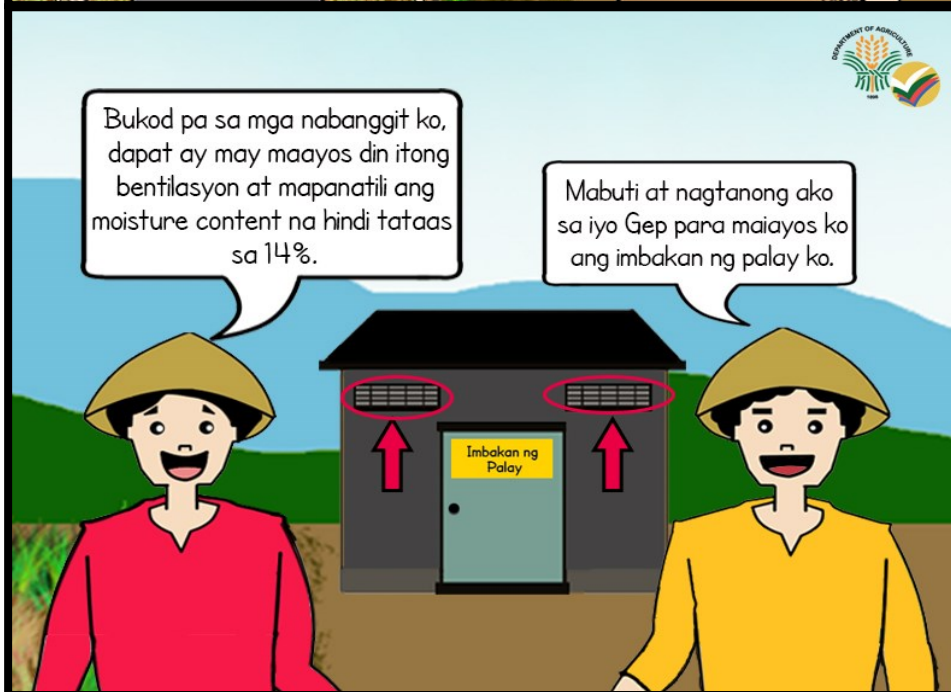

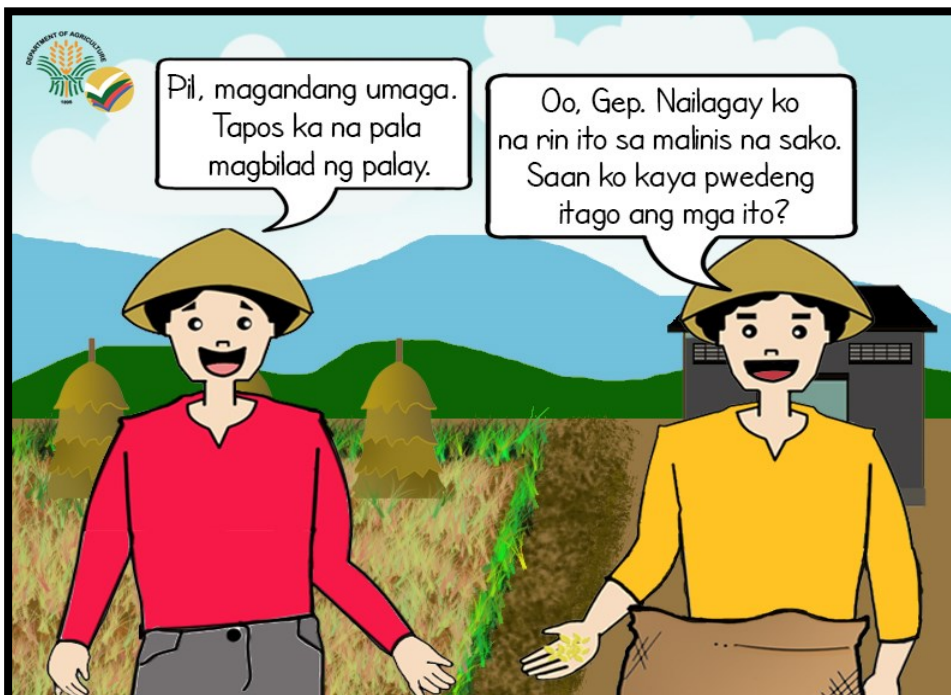

Bukod pa ryan, ang mga tanim na palay ay dapat na agarang magiik (thresh) at ang mga butil nito ay agad na matuyo upang maiwasan ang pagbaba ng kalidad.

Aha! Salamat sa impormasyon. Ganon PALAYun!
